# ≫Safe City

Solution Highlights

- Stable, reliable, smart, visual system construction
- Multiple applications in service
- Unified VMS for various products

- 4K and starlight IPC for better coverage and more details
- Reliable, efficient, cost-effective storage
- Provide SDK interface for third-parties, system is easy to connect and integrate

Security Surveillance

>> Metro Line

Solution Highlights

- NGN architecture
- High-end IP storage for video recording reliability
- Comprehensive security integration
- Intelligent analysis application

### Solution Network Topology

>> Highway

Solution Highlights

- Multifunctional IPC is suitable for different scenarios in highway
- Management efficiency is improved by cutting-edge technologies
- Reliable, efficient, cost-effective storage
- Easy to expand and maintain

Solution Network Topology

>> Enterprise

Solution Highlights

- Entry & Exit Management System
- Video surveillance and Alarm System
- Smart Management System

Campus

Solution Highlights

- Entry & Exit Management System

- Crossing line and intrusion detection for outdoor park

- Remote monitoring is flexible for users to master the real-time dynamics of campus

- Central control and management with video wall
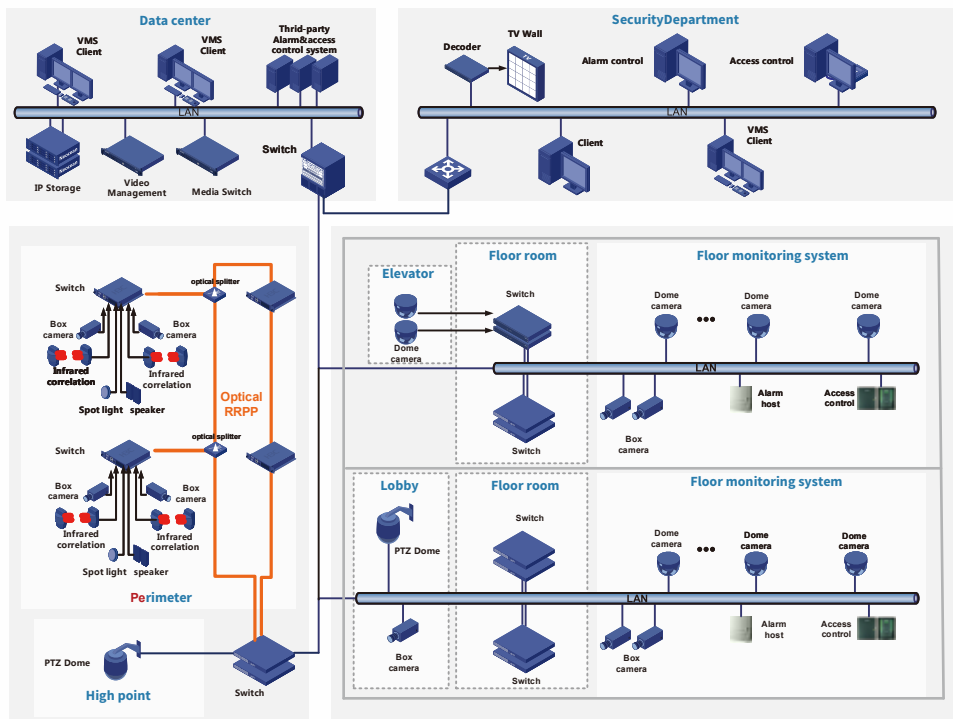

Solution Network Topology

Commercial Complex

Solution Highlights

- Providing no blind spot video for all scenes to reduce the cost of manual work and promote security level

- Mobile and remote access to improve work efficiency

- Cooperative business for commercial strategy
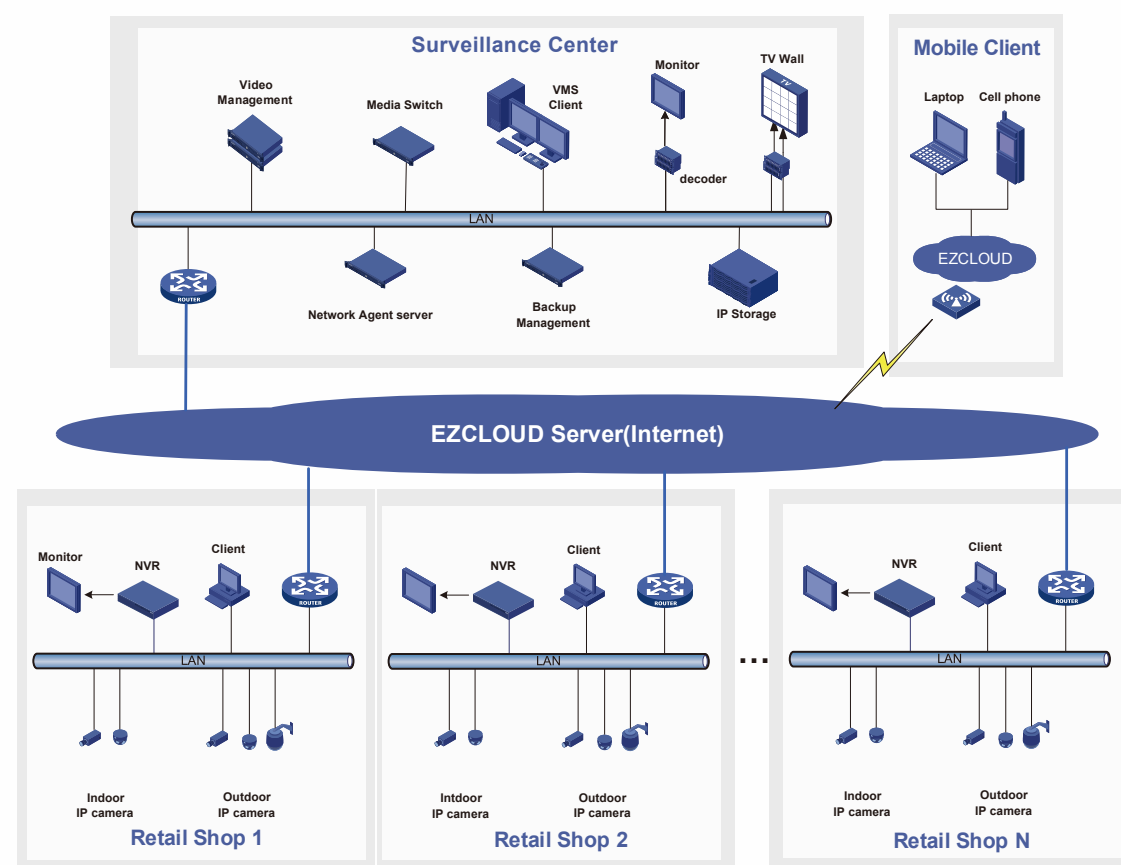

Solution Network Topology

⚡ Retail

Solution Highlights

- IPC and PoE NVR make a convenient solution for single site
- EZCloud provides quick and easy multiple sites connection from Internet
- VMS supports extended multiple sites management
- Support central backup storage solution

Technical service system includes troubleshooting platform, engineering project management platform, spare parts management platform, service information platform, etc. Starlink provides timely, normative and high quality service for customers, distributors and engineers.

The most complete service platform in the industry

Quality Service

The most comprehensive service in the industry

Global Technical Support Center
•Pre-sale: product selection & solution design support
•System building assistant: System start-up and operation support
•After-sales: operation & RMA service

R&D Support
•SDK/API/ONVIF integration support
•OEM/ODM service
•Project on-site support

The global **24-hour** emergency response service center overcomes the challenges of distance, time and area. By using various real-time communication methods, it can solve problems for global customers promptly.

Global 24-hour service

The most professional surveillance technical certification

•Starlink security technology training camp and certification center focus on teachers, students and distributors.
•More than **100** cooperative institutions, 6 curriculum systems fully covered video surveillance, storage, ITS, transmission technology, software development and other aspects, the major courses are technical training and certification.
•**26,000** people from all over the world are trained, and more than **6,000** people are certified.
•The authoritative certification system includes three levels: engineer, intermediate engineer and senior engineer.

•Starlink smoothly delivered over **1000** major projects.
•Starlink owns mature management system for project, especially for big projects, unique engineering management methods and IT system. Starlink can manage all of the projects through professional system.
•There are professional project managers in the headquarters and branch offices, who successfully guaranteed the delivery of Hangzhou G20 summit security project in 2016.

The most mature project service system in the industry
